

We shall depart from central Israel and drive around 1 hour and a half till we reach an isolated ranch in the Jordan valley near Jericho.

We shall proceed to a unique memorial site in which an army helicopter was crushed in 1977 killing 54 soldiers. In this location we shall hear the story of the incident and taste the local pita bread baked on the spot with a locally made olive oil.

We shall continue and visit the ranch and hear the special rehabilitation activities taking place in the ranch for special children and youth. We shall proceed to a deserted army post in the Jordan valley (subject to army approval) . In this place, during the 60's - Palestinians militants tried to capture this post with

no success.

We continue to Qasr Al- Yahud - a special place just recently opened to the public on the Jordanian border.

Many biblical stories are connected to this place including the first baptism of Jesus Christ and the crossing of The Israelites to the land of Israel.

We shall continue on a special off road vehicle or ATVs in the Savannah of the Jordan Valley - a unique experience in a place that only few people visit!

We shall be exposed to ancient places and to the wild beauty of the nature!

We proceed to the magnificent observation point of the St. George Monastery in the Wadi Kelt where we shall have a unique rich dinner with exotic local food and drinks
